Wiring for the Battery & Motor

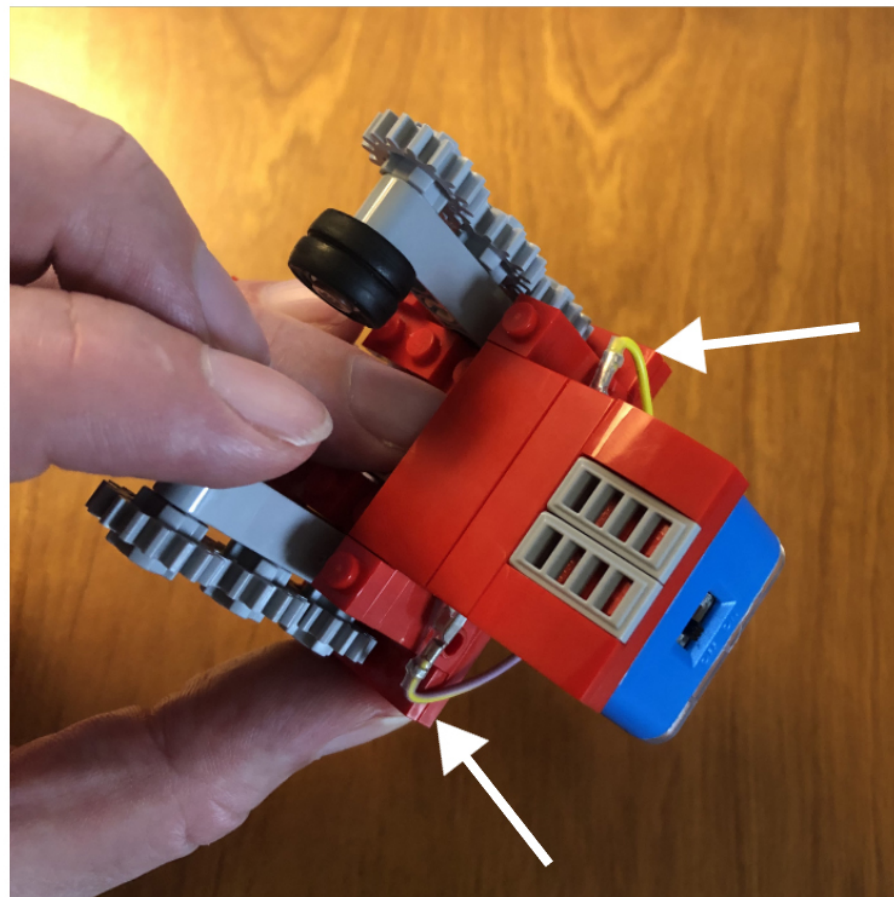

Insert the "plug" end of the wire into the side of the motor. Push it in until less than half of the plug (black) still shows.

Run the wire under the carriage and connect the two clips to the battery terminals -- you may have to CAREFULLY separate (split) the wire as shown.

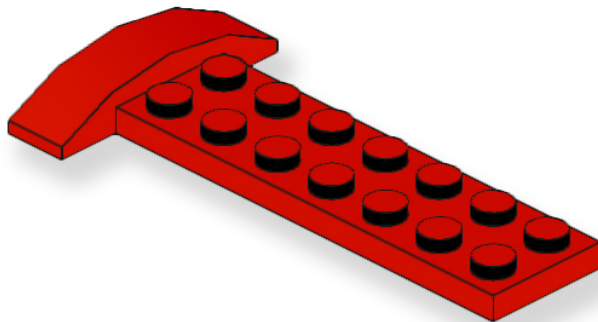

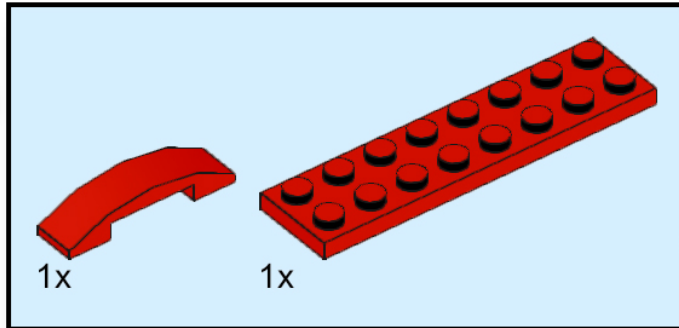

Additional view

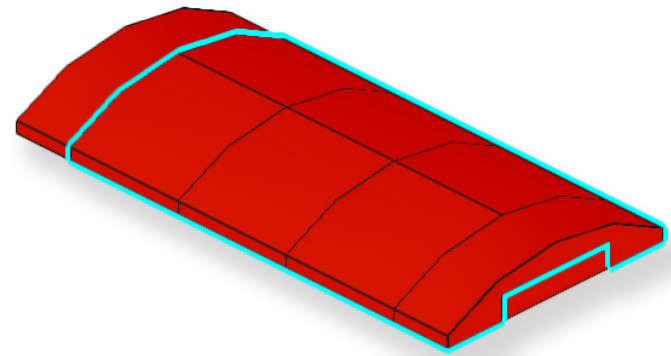

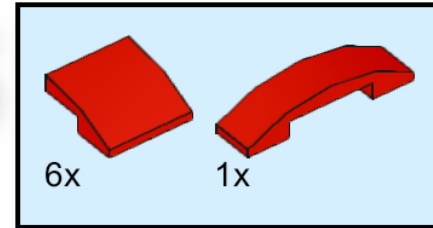

Once clips are attached, push them toward the front of the carriage as much as possible, as shown. For reference, the blue battery is at the BACK of the carriage.
